TEKenable

TEKaviation

Transform your legacy systems with our TEKaviation solution, Argot.

Argot is designed by Aviation experts from the leasing industry and enables us to speak the language or "Argot" of lessors, whether that's transaction bibles, deal tombstones, net spread or quiet enjoyment.

TEKaviation started with the need to provide custom solutions for the Aviation sector.

We believe in systems that adapt and grow when needed and our focus is on user-friendly experiences and scalability. Most notably, our aviation lease management system – Argot – acts as a "system of record," efficiently managing your core business processes. It empowers leaders to uncover improvements and drive significant efficiency gains across departments in their aviation business.

Our Argot solution offers:

- Ability to simplify and streamline your aviation processes
- Boost your efficiency and cut operational costs
- Trim labour-intensive admin tasks
- Capture and share accessible data
- Minimise paperwork
- Enable remote approvals and digital signatures
- Enhance automation

Deals are the lifeblood of every Aviation lessor, and we aim to be at the heart of your organisation operating 24/7, ensuring deals flow to all parts of your organisation.

Introducing Argot

Argot includes several integrated modules, that can be implemented all at once or using a phased approach.

DEAL MANAGER MODULE

Traditional CRM requires the individuals to work for it, our Argot Deals module is different it works for you!
Streamline your Deal Management from QMIs to LOI's, with our Deal and CRM Manager. It automates time-consuming tasks, enables greater collaboration at deal team level, and more efficient deal management throughout all phases of a deal.

CONTRACT MANAGER MODULE

Our Argot Contracts module keeps your leasing agreements organised, accurate, and compliant. This central hub features automated compliance checks and real-time updates, reducing errors and legal risks. Gain clear visibility into your lessee's obligations, enabling proactive management and smarter decision-making throughout each lease's lifecycle.

FINANCE MANAGER MODULE

The Argot Finance module is built to cope with all the financial demands for global Aviation lessors and will produce statutory and management reporting that can cope with complex corporate structures and also provide detailed financial information down to MSN level. Built in modules for acounts payable, accounts receivable, cash management, fixed assets & general ledger.

With a scalable platform that has been battle-tested and seamlessly integrates with your existing systems, Argot is ready to evolve to your business needs.

Leverage Microsoft capabilities to significantly reduce low value administrative tasks.

Gain effective deal management and approvals, on the fly.

Human led, AI assisted decision making at your fingertips.

This isn't just an upgrade, it's the start of a business transformation specifically built for Aircraft Lessors! Get in touch through our website www.tekaviation.ai to Book a Demo.
